<sup>2</sup>Address (full postal address together with E-mail address)

*Each manuscript is to be accompanied by an Abstract written using Times New Roman Italic Fonts, size: 12, single spaced, justified. The Abstract is one paragraph, limited to 250 words.*

## **I. Introduction**

*e-LC* posts documents describing original research in the area of liquid crystals and orientationally ordered soft matter.

Contributions should follow the guidelines below.

Format: single column, with paper size 8.5"x11" and 1" margins on sides, top and bottom.  
Font: Times New Roman; Font Size: 12pt.

Paragraphs are to be single spaced, indented and justified.

Language: English.

The document is to be submitted as a single pdf file incorporating tables and figures. Audio, video and other files can also be linked to the publication via embedded hypertext links; the corresponding files are to be stored on a server made available by the authors. It will be the authors' responsibility to ensure such files are continuously available. Documents must be complete and comprehensible even without such files.

The maximum acceptable document size is 2Mbytes.

References [1] are to be numbered consecutively in the text in square brackets, and listed at the end of the manuscript with reference numbers. The names of authors, title, journal name, volume, beginning and ending page numbers and year of publication should be provided as indicated.

Pages are to be numbered; page numbers are to appear centered at the bottom of each page.

## **II. Results**

## 1. Experimental results

Description of experiments should be sufficiently detailed to enable interested readers to repeat the work. The source and purity of relevant materials used should be given. Methods of sample preparations should be described.

Each Table and each Figure is to be numbered and a caption is to be provided. Figure captions are to be centered. An example is provided below.

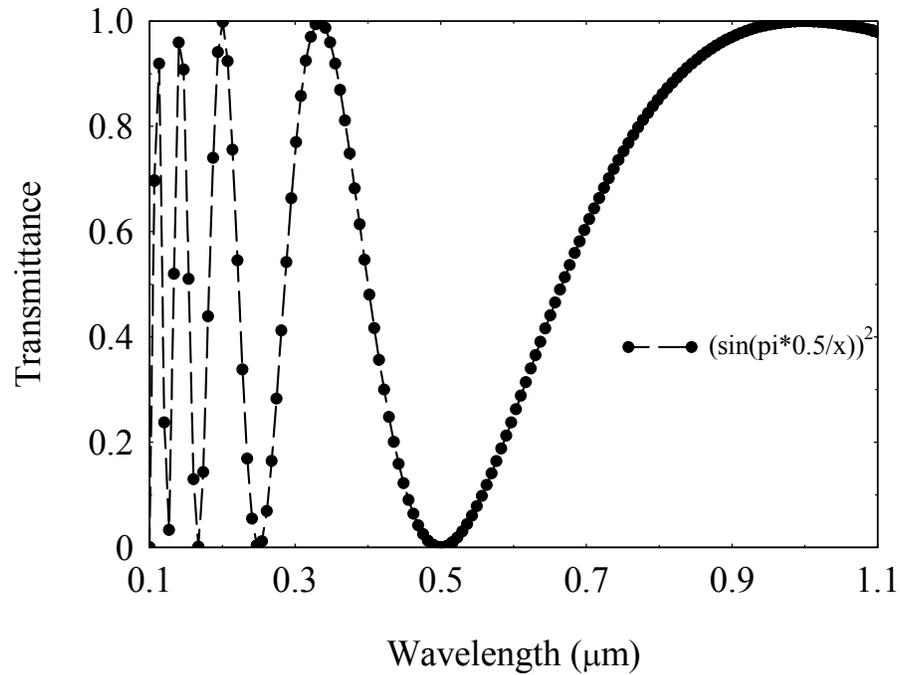

Figure 1: Figure captions should be 10pt. bold Times New Roman.

## 2. Theory

Equations must be presented clearly and unambiguously (Math-Type or Latex formats are suitable). Inline equations, e.g.  $E = mc^2$  should not be numbered. Displayed equations - both mathematical and chemical - should be numbered consecutively in parentheses, right justified, as shown below.

$$E = mc^3 \tag{1}$$

Symbols should be in italics.

### III. Discussion

The authors bear responsibility for their work and will retain the copyright.

Editors will ensure that submitted documents are reviewed in a timely fashion, and that the decision regarding acceptance is made within one week from submission. Authors will be notified of acceptance or rejection, without detailed explanation of the reasons for the decision. Accepted documents will be posted, as submitted, without editing, on acceptance. Documents not meeting format or language requirements will be automatically rejected.

Since there is no opportunity to edit submitted documents, and since posted documents will be appraised by readers of *e-LC*, whose comments will be attached to the documents, authors are encouraged to submit only carefully finished work.
